

About Children's Minnesota

Children's Minnesota is the seventh largest pediatric health system in the United States and the only health system in Minnesota to provide care exclusively to children, from before birth through young adulthood. An independent and not-for-profit system since 1924, Children's serves kids throughout the Upper Midwest at two free-standing hospitals, 12 primary and specialty care clinics and six rehabilitation sites. Additionally, Children's is Minnesota's only Level I pediatric trauma center inside a hospital dedicated solely to children. Children's maintains its longstanding commitment to the community to improve children's health by providing high-quality, family-centered pediatric services and advancing those efforts through research and education. This work is made possible in large part by generous philanthropic and volunteer support from individuals and organizations throughout the state and region. An award-winning health system, Children's is regularly ranked by U.S. News & World Report as a top children's hospital.

Opportunity Overview

The Department of Pediatric Radiology at Children's Minnesota is seeking a second Pediatric Interventional Radiologist with fellowship training in pediatric and/or adult interventional radiology. The candidate would be joining an experienced group of 15 Pediatric Radiologists with current specialists in Interventional, Neuro/Head & Neck, and Musculoskeletal radiology. Applicants should be BE/BC in Pediatric Radiology with dedicated Pediatric Interventional Radiology experience.

The radiology department at Children's Minnesota performs more than 100,000 imaging procedures a year utilizing the latest imaging technology. In addition to joining our outstanding radiology program, the successful candidate will become the second dedicated Pediatric Interventional Radiologist at Children's and help develop/grow the newly-formed interventional radiology program. Currently, Children's has 1 dedicated Pediatric Interventional Radiologist with board approval for program expansion, including a second Pediatric Interventional Radiologist, dedicated technologists/nurses, scheduler, and construction of a new state-of-the-art pediatric interventional radiology suite (slated to be operational in late 2019/early 2020). The program is active in several multidisciplinary clinics, including vascular anomalies and pediatric thyroid cancer clinics, and currently performs several hundred procedures annually. The preferred candidate will have strong interests in program development, extensive experience with interventional procedures in children/young adults, and have interest/experience in the interpretation of diagnostic pediatric radiology exams.

Qualifications:

- Active Minnesota M.D. or D.O. medical license or eligibility.
- Board Eligible/Certified in Pediatric Radiology.
- Additional fellowship training in Pediatric and/or Adult Interventional Radiology desired.
- Expertise in interventional procedures in children/young adults.
- Interests in pediatric interventional radiology program development.
- Active DEA Registration.
- Children's Minnesota Hospital privileges or ability to obtain privileges.

**For consideration, please submit your cover letter and CV to Ryan Berreth.
