The Department of Radiology at Texas Children’s Hospital (TCH) is inviting an ABR certified or eligible Pediatric interventional radiologist to join one of the largest pediatric interventional radiology practices of the nation. A team of seven talented interventional radiologists cover all aspects of interventional radiology including but not limited to Vascular anomalies, Interventional Oncology, Liver transplant/Portal vein interventions, Biliary, GI, GU and MSK procedures, ECMO, and also OG/GYN related procedures such as uterine fibroid embolization, pelvic congestion, and Placenta Accreta. The candidate should have completed a fellowship in adult and pediatric interventional radiology. Interest in teaching, research and clinical program development by collaborating with other teams is desirable.

Texas Children’s Hospital, currently ranked No. 3 by the “US News Ranking”, is the largest Children’s Hospital in the USA with 959 licensed beds. The hospital leadership has an unwavering mission to offer the best of care to children and their families. Integrative, comprehensive and coordinated care is offered to create a healthier future for children and women.

Texas Children’s Hospital and the Department of Radiology are committed to the classical tripartite mission of leading academic institutions. Clinical care, teaching and research are top priorities.

The Division of Interventional Radiology serves 4 locations, the Medical Center campus, West Campus- Katy, Woodlands and Legacy tower/Pavilion for Women, with a total of 7 rooms, including two Biplane IR labs. Future expansion of outpatient services is expected in all locations. The Division is expecting significant expansion with a new state of art IR floor, which is expected to open in June 2020 and will increase the procedural rooms to a total of 8 rooms.

Houston is the seat of international acclaimed Texas Medical center with research and teaching institutes providing opportunities for collaboration. Houston is a vibrant, multicultural, most ethnically diverse city in United States with variety of opportunities for entertainment, theater, sports and food. Texas Children’s is an equal opportunity employer.
